Re: Cover letter for application to join the CA/OCB Board

Dear Sir,

I would like you to consider my application for this position on your highly qualified board. I believe that I can significantly contribute to your organization's mission, thanks to my nursing skills and my experience in clinical and abnormal psychology. Moreover, I have worked with MSF/OCB and I am the former referral focal point for the mission in CAR.

Firstly, I would like to highlight that I have all the skills required to work on this prestigious board and meet all the demands required for this position. My clinical and abnormal psychology expertise has given me great insight into interventions within this field mission, allowing me to assess community needs and draw up action plans on priorities and activities with the aim of providing added value to the mission. I am very familiar with the non-profit movement; I am prepared to abide by its fundamental principles and values, and I am a great communicator. Furthermore, as explained in my CV-attached- I have a master's degree in clinical and abnormal psychology, plus over ten years of work experience. This has made me proficient and self-sufficient when responding to the hazards and requirements of this profession.

Joining this organisation would be a great opportunity for my future and I sincerely hope that I fit your profile. I am available for any further questions or interview.

Yours sincerely,

Signed in Bangui, 20th May 2023.
