

Monrovia, April 12, 2022

Dear Associative Members,

I write to solicit your support for my re-election to the OCB board member position.

I am a former MSF national staff with more than ten years of work experience in Liberia and at different project areas. I started with MSF as a young Physician Assistant during the civil war to care for war wounded people between fighting forces, internally displaced populations, malnourished children and during disease outbreak with inpatient care in different capacities. I stayed with MSF as a Physician Assistant at the Bush-road Island pediatric Hospital until the closure of the project in 2010 but got back to MSF again in 2014 as team leader in the MSF-ELWA 3 Ebola treatment center. I currently work with the MOH in my country Liberia in the position as National cold chain officer.

With commitment, I have actively served the Liberia MSF Association in key leadership position to up hold the principle and value in keeping the spirit of the MSF Social Movement alive even during the years when there were no MSF operations in the country. Due to the commitment of the members of the Liberia Association, we were able to remain active and assist MSF to get back when the Ebola virus outbreak occurred in Liberia.

The MSF OCP operation in Liberia is near closure which is an indication that the Liberia Association will be governing herself as it has been when no MSF operation in country. This is a clear ground for me to provide my consultative advice to the Liberia Associative life in keeping with the principle and value of MSF and the Social mission.

My compliments for your confidence posted in me to serve you during this difficult times of the global pandemic. My assenting to the board diversified my capacity to decision making and interpersonal relationship to debate issues. I want to share with you my ambition to recontest the board membership position based on passion and commitment for MSF and its social mission, our humanitarian principles and values.

My admission to the MSF board have been very helpful for the growth of my personal life and all former and current field staff in Liberia. Though, I assented to the board not too long before the eruption of the deadly Covid-19 pandemic which restricted the possibilities for many of us to fully contribute and represent the movement face to face for reflection sharing and active participations in debate on priority issues to the growth of the MSF we want to be.

However, we have adopted to the universal change of Covid-19 pandemic by hosting our board meetings on line throughout the year 2020 to present which provided us the opportunity to implement our responsibilities as board members to follow up on motions, discuss issues for growth and improvements of our social movement and to represent the board at different FADs etc. I can assure you that my re-election to the MSF OCB board will be an added opportunity for me to gainfully and properly represent you for the fact that I have learned and understand the actual way of engagement for good representation.

In conclusion, I am asking for your kind support to my re-election as a member of the OCB board.

Thanks for your usual support

Jackson K.P Naimah

CURRICULUM VITAE

JACKSON K. P NAIMAH

PERSONAL DATA:

Last Name: NAIMAH
